MARBLE / Semantic Dictionary of Biblical Greek (SDBG)

What it is

The Semantic Dictionary of Biblical Greek (SDBG) is produced by the United Bible Societies MARBLE project. It extends the semantic domain system of Louw & Nida's *Greek-English Lexicon of the New Testament Based on Semantic Domains* (New York: United Bible Societies, 1996) and provides word-sense assignments for each word occurrence in the Greek New Testament.

How it is used here

SDBG data appears in two attributes on `<w>` elements in the lowfat and TSV output:

Attribute	Content	Example
`@domain`	Six-digit SDBG domain code	`089007`
`@ln`	Louw & Nida entry number	`89.32`

Example:

```
<w ref="LUK 1:1!1"
   lemma="ἐπειδήπερ"
   domain="089007"
   ln="89.32"
   gloss="Inasmuch as" .../>
```

Domain codes

The `@domain` value is a six-digit SDBG code. The first three digits identify the top-level domain; the last three identify the subdomain. Top-level domain numbers are the same as in Louw & Nida: `089` in SDBG corresponds to domain 89 ("Relations") in L&N.

SDBG uses numeric subdomains where L&N uses letters. The mapping is positional (A=1, B=2, C=3, ...): `089007` is subdomain 89G in L&N ("Cause and/or Reason"). Domain labels are in `marble-domain-label-mapping.json`.

Note: there is no direct relationship between a subdomain number/letter and the right-hand part of an entry number. Domain 89.32 is within subdomain `089007` (89G), but the 32 does not indicate position within the subdomain — each subdomain contains a set of entries with independent numbering.

Louw & Nida entry numbers

The `@ln` value is the entry number in Louw & Nida. Multiple lemmas may share an entry (they convey the same sense). For example, LN 89.32 covers ἐπεί, ἐπειδή, and ἐπειδήπερ, all meaning "because, since, for, inasmuch as."

Source files

File	Contents
`sdbg-senses.xml`	Per-word-occurrence SDBG sense assignments
`sdbg-domains-glosses.xml`	SDBG domain codes with L&N entry numbers and glosses, keyed by MARBLE morphology ID
`marble-domain-label-mapping.json`	Human-readable labels for all SDBG domain and subdomain codes

`MARBLE-macula-domains-ln.xml`	Mapping between MARBLE IDs and macula word IDs with domain/LN values
